Lauren Gordon-Fahn

Milwaukee, WI

Github laurengordonfahn | Linkedin linkedin.com/in/lauren-gordon-fahn

I am a dedicated learner, a believer in the documentation and sharing of knowledge, passionate about teamwork, and a lover of patterns and puzzles. I am looking for a team where I can grow deeper roots in Java or .NET and evolve into a Senior Developer and Data Architect.

Skills Summary

Languages | Python, C#, Apex, Ruby, JavaScript (ES6, AJAX, JSON), HTML, CSS, SQL
Operating Systems | Mac OS X, Linux, PC
Frameworks/Libraries | Serverless, Lambda/API Gateway AWS, ASP.NET, Salesforce, Flask, React, jQuery, Bootstrap, Milligram, Chart.js
Database/Tools |DynamoDB, RDS, MySQL, PostgreSQL, Git, GitHub, Command Line

Experience

LPi | Software Developer | August 2018 – Present

AWS Node.js Backend Developer

- Architected and developed API service to process data coming from our internal system (Node.js Serverless Framework, AWS Lambda/API Gateway, SQS, Cron)
- Researched best stack and tools for use case, documented requirements and architecture

AWS Python Backend Developer

- Architected and led development on an email scheduling API (Python Serverless Framework API, AWS Lambda/API Gateway, S3, DynamoDB, Marketo API Integration)
- Architected MySQL database to sync data from multiple applications (Python Serverless Framework API, AWS API Gateway, MySQL RDS)
- Documented requirements of each project, architecture, and all tools used

Research and Development

- Led research of new CRM tooling and led team education in a new framework (Plone)
- Microservice research
  - Team's primary researcher for new projects, stacks, and tools

    o   Closely worked with business to create new products that meet company requirements (documentation, data architecture, and defining data requirements)

ASP.NET(C#) Full Stack Developer

- Translated a Flash data reporting service to ASP.NET
- Created Unit Tests for an API (FluentAssertions, NUnit, Moq)
- Took part in creating administrative UI (JQuery, Javascript, Razor)
- Created comprehensive documentation of reporting service
- Led testing education for the team (documentation and presentations)
- Represented developers in collaboration with BA team to create stronger documentation of requirements

LPi | Software Developer Intern | December 2017 – August 2018

Salesforce full-stack developer

- Worked on a social-network and administration tool for structured communities, such as parishes (Salesforce, Apex, Javascript)
- Organized and wrote documentation to improve team efficiency

Certifications

Salesforce Administration Certified (2018 – Present)

Education

Hackbright Academy Computer Software Bootcamp| Certificate

San Francisco, CA | September – December 2016
Accelerated, 12-week, San Francisco software engineering program for women

New England School of Acupuncture| Master's degree in Acupuncture and Oriental medicine (3.87)

Newton, MA | 2011-2014
Passionate about learning where there are overlaps and divergences between Western and Eastern sciences

Hamilton College| Bachelor's of Science concentration in Theoretical Mathematics (88.08)

Clinton, NY | 2002-2006
For a love of learning logical thinking and abstract problem solving
